TERM

The term of this product is unlimited.

OBJECTIVES

The Sub-Fund aims to beat the stock market over the long term, and to outperform the Stoxx Europe 600 Index Net Return over an investment horizon of at least five years. At least 75% of the total exposure of the Sub-fund will be invested in equities and the remaining total exposure will be in debt securities. The foreign exchange risk will reach a maximum of 100% of the Sub-Fund's assets. The Sub-Fund is actively managed and the composition of the portfolio may differ at times from the composition of the Stoxx Europe 600 Index Net Return.

INTENDED RETAIL INVESTOR

This product is intended for investors who plan to stay invested for at least 5 years and who understand the risk of the sub-fund and seek a return over the long term investing in equity markets.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a 'medium' risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme. The indicator shown above does not consider this protection.
