Key Information Document

BESTINVER SICAV LATIN AMERICA CL R EUR

PURPOSE

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

PRODUCT

Name of Product: BESTINVER SICAV LATIN AMERICA CL R EUR

ISIN: LU1580473145

Name of PRIIP manufacturer: BESTINVER GESTION SGIIC, S.A.

Website for PRIIP manufacturer: www.bestinver.es

Call +34 900 878280 for more information.

This PRIIP is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Waystone Management Company (Lux) S.A., appointed as the UCITS Management company, is regulated in Luxembourg by the Commission de Surveillance du Secteur Financier as a management company pursuant to Chapter 15 of the Law dated 17 December 2010 relating to undertakings for collective investments.

Date of production of the KID: 12/31/2023

WHAT IS THIS PRODUCT?

TYPE

UCITS Sicav.

TERM

The term of this product is unlimited.

OBJECTIVES

The Sub-Fund aims to beat the equities market over the long term, and to outperform the S&P Latin America 40 index returns over an investment horizon of at least five years. To achieve this objective the Sub-fund will invest at least 75% of its assets in equities primarily based in the Latin American region, with no restriction on sector or capitalization. The Sub-fund is actively managed and the composition of the portfolio may differ at times from the composition of the S&P Latin America 40 index.
The Sub-fund will invest mainly in the equity of companies listed or with domicile in Brazil, Mexico, Chile, Colombia or Peru, or in ADR or similar financial instruments referred to equity of such companies, with no restriction on allocation between these various countries.
The Sub-Fund takes Sustainability Risk and ESG characteristics into account as part of its selection process. In that respect, the Sub-Fund promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR.

INTENDED RETAIL INVESTOR

This product is intended for investors who plan to stay invested for at least 7 years and who understand the risk of the sub-fund and seek a return over the long term investing in equity markets

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

1	2	3	4	5	6	7

Lower risk — Highest risk

The risk indicator assumes you keep the product for 7 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.We have classified this product as 5 out of 7, which is a 'a medium-high' risk class.This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme. The indicator shown above does not consider this protection.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

Recommended holding period: 7 years			
Investment amount: 10.000 €			
Scenarios		**If you exit after 1 year**	**If you exit after 7 years**
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	**What you might get back after costs**	**550 €**	**184 €**
	Average return each year	-94,50 %	-43,50 %
Unfavourable	**What you might get back after costs**	**4.666 €**	**7.145 €**
	Average return each year	-53,34 %	-4,69 %
Moderate	**What you might get back after costs**	**10.064 €**	**12.571 €**
	Average return each year	0,64 %	3,32 %
Favourable	**What you might get back after costs**	**14.529 €**	**15.320 €**
	Average return each year	45,29 %	6,28 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. Unfavourable scenario occurred for an investment between 06/2021 and 12/2023. Moderate scenario occurred for an investment between 06/2012 and 06/2019. Favourable scenario occurred for an investment between 06/2014 and 06/2021.

WHAT HAPPENS IF BESTINVER GESTION, S.A., S.G.I.I.C. IS UNABLE TO PAY OUT?

Bestinver Gestion, S.A., S.G.I.I.C. is responsible for managing the sub-fund investments and does not hold any of its assets which are held in safekeeping by the Depositary. In the event of Depositary's insolvency, the sub-fund may suffer a financial loss. Such loss is not covered by an investors compensation or protection scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:
- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment 10.000 €	**If you exit after 1 year**	**If you exit after 7 years**
Total costs	242 €	2.215 €
Annual cost impact (*)	2,4 %	2,9 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6,22 % before costs and 3,32 % after costs.

COMPOSITION OF COSTS

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

One-off costs upon entry or exit		**If you exit after 1 year**
Entry costs	We do not charge an entry fee	0 €
Exit costs	We do not charge an exit fee for this product	0 €
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2,3 % of the value of your investment per year	231 €
Transaction costs	0,1 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	11 €
Incidental costs taken under specific conditions		
Performance fees and carried interest	There is no performance fee for this product.	0 €

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

RECOMMENDED HOLDING PERIOD: 7 YEARS

The recommended holding period is 7 years.

HOW CAN I COMPLAIN?

If you have a complaint you can contact us by calling +(34) 900878280 or by writing to our investor service desk at serviciodeatencionalcliente@bestinver.es.

APPENDIX 2

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Bestinver Latin America Sub-Fund **Legal entity identifier: 59800Y5M48BB9WCS176**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes environmental and social characteristics by promoting climate change mitigation and adaptation characteristics among the investee companies. Digitalization and automation , among all other ESG themes and factors, is currently the biggest enabler for developing economies to increase productivity and to extend the reach of financial services and other basic services like education and healthcare to larger segments of their population. Therefore this financial product focuses on digitalization and automation across all segments of the economy. The Sub Fund does this in two ways:

(1) Part of the portfolio is directly invested in the Digitalization and automation theme, so

we invest in companies that provide solutions that enable consumers or companies (public and private) to digitalize their offering and access of products and services. For example, companies involved in software or e-commerce, digital platforms, fintech, etc. Furthermore, for the rest of the companies whose activities do not directly provide solutions for digitalization or automation, the fund expects them to embed digitalization in their strategy and operations.

(2) Additionally, the Sub Fund expects companies to implement plans to align their businesses to the objectives of the Paris agreement and to effectively manage climate transition risks. The Sub Fund also promotes that companies provide transparent and reliable information about their climate footprint and progress towards the climate targets they have set. As a matter of fact, these issues are the pillars of the fund's internal ESG rating targets regarding the internal environmental score. Finally, the fund applies specific exclusion criteria to avoid investment in companies that have substantial involvement in activities that are considered to be detrimental to climate change mitigation and adaptation.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

In order to measure the attainment of the ESG characteristics promoted by this Sub Fund, the Sub Fund uses the following indicators:

(1) For the companies that are invested through the digitalization and automation theme, the Sub-Fund requires that at least 30% of the revenues are related to solutions for digitalization or automation. In order to measure this involvement, the fund uses the oficial quarterly info provided of their activities carried out by the invested companies.

(2) For the whole portfolio, even for the companies whose activities do not directly provide a solution for climate change mitigation and/or adaptation, the fund expects them to embed climate change in their strategy and operations. Thus, the Sub-Fund expects companies to implement plans to align their businesses to the objectives of the Paris agreement and to effectively manage climate transition risks. The Sub-Fund also promotes that companies provide transparent and reliable information about their climate footprint and progress towards the climate targets they have set. In order to assess the alignment of the companies with the Paris agreement and the level of transparency regarding climate change related information, the Sub-Fund uses the following indicators:

a. Whether company´s climate targets are set according to the Science Based targets initiative https://sciencebasedtargets.org/

b. Whether the company provides information to CDP and what score has CDP assigned to their climate change policies www.cdp.net

c. Whether the company follows the recommendations of the Task Force for Climate Related Financial Disclosures www.fsb-tcfd.org

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

N/A

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

N/A

How have the indicators for adverse impacts on sustainability factors been taken into account?

N/A

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes, ______

☒ No

While the Sub-Fund promotes ESG characteristics, it does not currently commit to investing in any "sustainable investments" within the meaning of the SFDR. Accordingly, it should be noted that the investments underlying this Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, as amended from time to time (the "Taxonomy Regulation").

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment strategy of the Sub-Fund follows a thematic approach and applies exclusions and ESG integration.

__Thematic approach:__

The Sub-Fund invests in Latin American equities with a long-term investment horizon. The strategy mainly invests in Brazil, Mexico, Chile, Colombia and Peru. The strategy aims to be significantly different to the indices and rest of the investment alternatives within the region, that are commonly highly exposed to raw materials, infrastructures and large cap banks.

The objective of the strategy is to generate long-term returns by selecting attractive and sustainable businesses that are well managed and show considerable upside potential.

The strategy focuses mainly in activities related to the consumer through 5 main themes that the fund believes have great structural and sustainable long term growth:

(1) improvement of the quality of life (such as health care, pharmaceutical companies, healthy food industries, bio pharma, leisure, sports, mobility)

(2) financial inclusion and formalization of workforce (community banks, fintechs, asset managers, payment methods)

(3) middle class growth (education, e-commerce, affordable housing)

(4) digitalization and automation of the economies: interconnectivity, innovation and high technology (such as companies involved in software or e-commerce, digital platforms, fintech, etc.)

(5) decarbonization of the economy (such as renewable energy, electric vehicles, improvement of transportation, cleaner environment and water).

Exclusions:

To ensure that the companies in which the Sub-Fund invests contribute to a more sustainable world, the Sub-Fund will avoid investing in activities that can cause significant harm, for which it applies exclusion criteria to certain activities that we detail in this document.

ESG integration:

Once the eligible universe is established by means of applying the Sub-Fund exclusion policy (described in the Sub-Fund prospectus), the identified opportunities that are considered to be potential additions to the portfolio are subjected to detailed fundamental analysis. An exhaustive evaluation is carried out of the key environmental, social and corporate governance risks and opportunities, using both the investment team knowledge and the information provided by external ESG data providers. Based on this analysis, an internal ESG rating is assigned to each company, classifying them into 4 categories: Gold, Green, Amber and Red.

- Gold category: This category includes companies with the best ESG performance and that are especially sensitive to the sustainable impact of their businesses. These companies not only represent a financial investment opportunity, they are also considered to be the most sustainable overall by the Bestinver investment team.

- Green category: After exhaustively analysing the inputs of the ESG factors, both external and internal, and having evaluated their risks, the investment team considers that the potential benefit of investing in these companies is much higher than the identified risks, as these are of low impact and with a high potential of mitigation.

- Amber category: The investment team considers that certain aspects of the business or the ESG management of the company can be improved, but that they do not create a significant risk to people and/or the environment and do not endanger its potential profitability.

- Red category: The companies with a red rating have no place in the portfolio. Severe environmental, social or corporate governance risks are identified in their analysis. These are considered unacceptable and/or, in any case, greater than the potential profitability of investing in them.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

As stated in the Sub-Fund's investment strategy, there are three overall binding elements used to select the investments to attain the promotion of climate change mitigation and adaptation characteristics:

(1) For the companies that are invested through the Sub-Fund digitalization and automation theme, the Sub-Fund requires that at least 30% of the revenues are related to solutions for digitalization and automation. In order to measure this involvement, the fund uses the oficial quarterly info provided of their activities carried out by the invested companies.

(2) For the whole portfolio, the Sub-Fund will not invest in companies that have substantial involvement in activities that are considered to be detrimental to climate change mitigation and adaptation, using the following exclusion criteria:

   a. Companies with any (more than 0%) of their revenues involved in extraction of thermal coal;

   b. Companies with more than 10% of revenues involved in the following activities: thermal coal power generation, extraction of non-conventional oil and gas (shale gas and oil sands), fossil fuel exploration and exploitation in Arctic regions, palm oil production; and

   c. Companies with more than 15% of their revenues involved in conventional oil and gas production

(3) The Sub-Fund will apply additional exclusion criteria to all companies not related to climate change mitigation and adaptation:

   a. Companies with any (more than 0%) of their revenues involved in the following activities: production and distribution (group 2) of tobacco, controversial weapons, production or distribution of assault weapons for use by civilians, production or distribution of adult entertainment (group 2);

   b. Companies with more than 10% of revenues involved in the following activities: alcohol production and distribution, operation, production and distribution of specialised equipment and support services in the gaming and gambling sector; and

   c. Companies involved in the operation and construction of nuclear energy plants if such company's activities are carried out in any country that does not comply with any of the following three conditions:

      i. the host country must be a member of the IAEA (International Atomic Energy Agency),

      ii. the host country must have ratified the Convention on Nuclear Safety, the Convention on the Physical Protection of Nuclear Material and the Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management (or have adopted adequate measures to comply with the requirements included in said conventions), and

      iii. the host country must have ratified the Non-Proliferation of Nuclear

Weapons Treaty and the International Convention for the Suppression of Acts of Nuclear Terrorism.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

  N/A

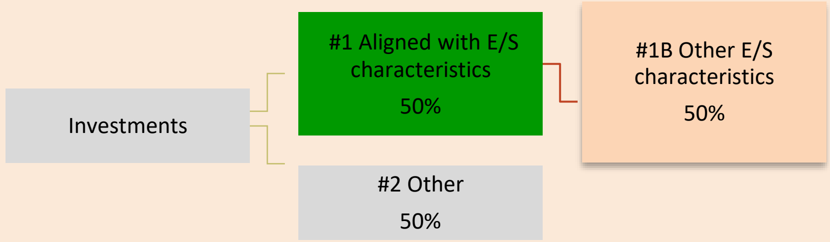
- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager takes into account good governance practices as part of the fundamental ESG analysis carried out for all investee companies. As such, the Investment Manager rely on information provided by multiple ESG external partners, mainly focused (but not limited to) the following factors: Board/Management quality and integrity, Board structure, Diversity, Ownership and shareholder rights, Remuneration policies and schemes, Audit and financial reporting and Stakeholder governance, among others.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product in accordance with the binding elements of the investment strategy is 50%. The Sub-Fund investment will be made to attain the Environmental and Social characteristics of the product.

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

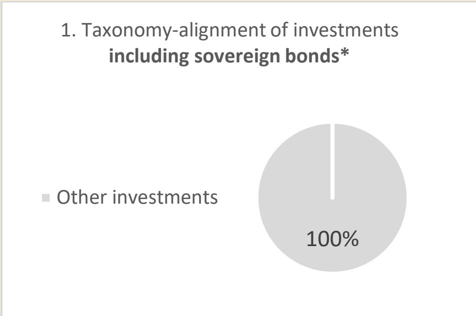
- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*****?**

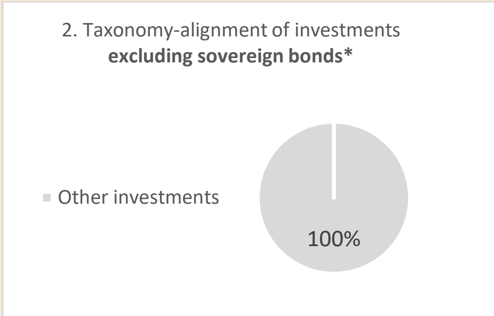
Whilst the Sub-Fund may use derivatives as part of its investment strategy, the use of derivatives is not with a view to attaining the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy? N/A

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

What is the minimum share of investments in transitional and enabling activities?

N/A

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?
N/A

What is the minimum share of socially sustainable investments?
N/A

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining 50% of the portfolio will be invested in the following instruments and/or under the compliance of the following criteria:

(1) Instruments which, by their own nature, cannot be considered as eligible to apply the fund's ESG investment strategy and analysis process. These instruments are, though not limited to, cash, deposits, derivatives, etc.

(2) Companies which do not comply with the binding elements of the fund (detailed in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?"). However, even though these companies do not comply with the binding elements, the fund will enforce them to comply with the Investment Manager's Responsible Investment policies and principles, which are mandatory to all funds managed by the Investment Manager and which can be summarized in the following elements:

a. An exclusion policy, classified in three groups (depending on the impact their activities have on society and the environment):

i. Group 1: Companies with any (more than 0%) of their revenues involved in the following activities: controversial weapons, production and distribution of assault weapons for use by civilians, thermal coal extraction, operation and construction of nuclear energy plants in certain countries (if the companies do not comply with the criteria described in the previous section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?") and production of tobacco and tobacco-related products;

ii. Group 2: Companies with more than 10% of their revenues involved in the following activities: thermal coal power generation, distribution of tobacco and tobacco-related products and associated services, extraction of non-conventional oil and gas (shale gas and oil sands), fossil fuel exploration and exploitation in Arctic regions, palm oil production, production and distribution of adult entertainment content and operation, production and distribution of specialised equipment and support services in the gaming and gambling sector; and

iii. Group 3: Companies included in this group will be "under observation", which means that the Investment Manager will perform exhaustive analysis to make sure that they are carrying out their business responsibly and that they have established transformation plans to improve their environmental, social and/or corporate governance performance. These sectors and activities are the following: companies with over 50% of their turnover derived from conventional oil and gas production, generation and associated services, companies with over 10% derived from alcohol production and distribution, companies with over 10% derived from pesticide production and distribution and companies that are guilty of serious violations of international human rights standards and principles.

b. An ESG integration policy, by which all companies in the eligible universe (once the exclusion policy has been enforced) are subjected to detailed ESG analysis, using both the investment team knowledge and the information provided by external ESG data providers. This analysis requires that all companies are assigned an internal ESG rating (ranging from Gold or Green to Amber or Red).

c. An active ownership policy, by which all companies in the portfolio must comply with the engagement and the voting policies described in the Investment Manager's Responsible Investment principles and policies (publicly available in the following link: https://www.bestinver.es/wp-content/uploads/Responsible_Investment_Principles_Bestinver.pdf)

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*** N/A
- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*** N/A
- ***How does the designated index differ from a relevant broad market index?*** N/A
- ***Where can the methodology used for the calculation of the designated index be found?*** N/A

Where can I find more product specific information online?

More product-specific information can be found on the website:

The Investment Manager's Responsible Investment Philosophy can be found in the following link: https://www.bestinver.es/filosofia-de-inversion/inversion-responsable/

Adidtionally, two other relevant documents have been uploaded on the Investment Manager's website, as follows:
